5. Add missing items.

11.
$$\neg (P \supset Q) \qquad \vdash P \qquad \dots$$

- $\vdash \neg (P \supset Q) \supset P$ 12.
- 6. Prove $P \supset Q, P \lor Q \vdash Q$. Hint: Assume $P \supset Q$ and assume Q. Use \lor E.

7.	Recall the Prisoner's Dilemma (exercise for 3.1-4). Let P mean that Jerry will confess, and let Q mean that Ben is better off confessing. Turn the reasoning in the standardized form provided in the answer key into a derivation that utilizes EM (hint: the derivation will have two premises)
